Open to senior UI/UX and product design roles · remote or relocation

Senior UI/UX designer with 5+ years building digital products that pair genuine usability with business strategy, across enterprise analytics, fintech and consumer domains. I work end to end, from research and half-formed requirements through to scalable design systems and engineering handoff, and I measure success by what ships, gets adopted and moves the metric. Currently designing enterprise BI and AI-informed products at **Exult Global** for clients across the US and GCC.

PROFESSIONAL EXPERIENCE

Senior UI/UX Designer · Exult Global

Feb 2024 – Present · India

- Lead UX and product design across enterprise and analytics platforms for high-profile clients including Wheels Up, Dexcom, HIG Capital, Zayo and CyberProof.
- Wheels Up (USA): partnered directly with the VP of Business Intelligence to build an internal Figma BI design system that **unified 60+ dashboards**, **raised usability 40%** and **cut report-generation time 25%** across operations, sales, maintenance and finance.
- Own discovery through delivery: research, IA, component-based dashboards, design systems and prototyping, validated with executives and shipped with engineers via iterative design sprints.

UI/UX Designer · JIC IT Solutions

Jul 2023 – Feb 2024 · India

- Sea Arabia: a GCC travel and tourism platform, plus an independently designed vendor portal and CMS for activity management and content updates.
- Jobin Arabia: an end-to-end HR management system (HRMS) covering onboarding, attendance, approvals and role-based workflows.
- Bansal TMT & Bansal Hospital: loyalty and discount-management mobile apps with matching admin CMS web apps.
- Delivered user-centred designs through research, prototyping and close collaboration with PMs and developers.

UI/UX Designer · WeCreate (Mintyfusion)

Jul 2021 – Apr 2023 · Remote

- Redesigned and enhanced web and mobile products across fintech and service industries through user research, streamlined task flows and clean, intuitive UI.
- Designed SolarEnvoy, which reached **#6 in Productivity on the App Store**, recognised for its clarity and user satisfaction.

Creative Design Consultant · Freelance

Aug 2020 – Jul 2021 · Remote

- Delivered end-to-end UX and visual design for startups and SMEs, including Shutterup and Skillbus.
- Built cohesive design languages that improved engagement and usability across brand platforms.

CORE SKILLS

UX & Interaction: End-to-end UX/UI, User Flows, Wireframing, Prototyping, Journey Mapping, Information Architecture, Responsive Design

Research & Usability: User Research, Usability Testing, A/B Testing, Persona Development, Task Flows, Data-Driven Insights

Systems & Data: Design Systems, Component Libraries, Data Visualisation, KPI Dashboards, Developer Handoff

Product & Collaboration: Product Strategy, Discovery, Cross-functional Collaboration, Agile, Stakeholder Alignment

Emerging: AI-powered product design, prototyping with AI tools, design-and-tech trend research

Tools: Figma, Framer, Adobe XD, Protopie, FigJam, Zeplin, HTML/CSS

WRITING & EDUCATION

Writing: Publishes on UX, AI and product design, including "[AI-Powered Usability Testing](#)" on Medium.
